Agniva Dutta Chaudhury

WORK EXPERIENCE

MICROSOFT | Software Engineer — Dublin, Ireland | March 2025 - present

- Designed and implemented Geneva dashboards and alerting monitors to track WAF rule failures at environment and partner granularity, significantly reducing incident turnaround time for on-call engineers.
- Integrated configuration version exposure in the Stormbreaker protection module, enabling dynamic visibility into active rule versions for enhanced debugging and rollout observability.
- Collaborated cross-functionally to streamline WAF monitoring and version control, contributing to improved reliability and maintainability of platform-level protection services.

WORKDAY | Senior Associate SDE — Dublin, Ireland | Oct 2024 - Feb 2025

- Enhanced the time entry module by implementing a card framework using React, improving user experience and reducing time entry errors.
- Designed and implemented business logic using Workday's Xpresso framework to streamline complex time tracking workflows and integrate seamlessly with the existing ecosystem.

AUTODESK | Software Engineer Intern — Dublin, Ireland | May 2024 - Sep 2024

- Developed a real-time search solution using change data capture (CDC) techniques, enhancing the user experience for millions across 30+ Autodesk products.
- Built Splunk dashboards for observability and monitoring of Flink applications deployed across AWS regions, optimizing operational efficiency.

CISCO (APPDYNAMICS) | Software Engineer — Bangalore, India | Feb 2022 - Nov 2022

- Developed features for the APM product's Synthetic team using Java, Spring, DynamoDB, and AWS.
- Enhanced security by implementing a Python linter (flake8), mitigating risks for 40,000 production jobs.
- Contributed to DevOps tasks, including AWS EKS version upgrades, ensuring security compliance of services.

NTT DATA | Software Engineer — Bangalore, India | Apr 2021 - Feb 2022

- Designed APIs and implemented Mule solutions aligned with architectural requirements, driving proof-of-concept development..
- Contributed to a digital transformation in the automotive sector, using Agile to develop Mule4 interfaces for Enterprise Pricing and Asset Maintenance Software, achieving a 30% boost in operational efficiency.

ORACLE | Software Engineer — Bangalore, India | Sep 2018 - Apr 2021

- Delivered tailored technical and functional solutions for retail banking operations for a major financial client.
- Collaborated with clients to identify gaps, recommend solutions, and implement systems using Java, JavaScript, HTML, and SQL, ensuring smooth project execution.

EDUCATION

MSc. Computer Science (Negotiated Learning) — Dublin, Ireland | 2023 - 2024
University College Dublin
Relevant Coursework : Java, Cloud, Distributed Systems, Machine Learning.

B.E. Electrical & Electronics Engineering — Bangalore, India | 2014 - 2018
BMSIT & M

SKILLS

Languages: Java, JavaScript (Basic), Data Structures & Algorithms, SQL
Databases: MySQL, MongoDB, DynamoDB, PostgreSQL, Redis
Developer Tools: IntelliJ, VS Code, Crystal Reports, Anypoint Studio
Technology: Apache Flink, Apache kafka, Terraform, Git, AWS, Springboot, Mulesoft, PL/SQL
Certifications: AWS Certified Developer - Associate, Oracle Certified Associate, JAVA SE 8 Programmer
