Pramod Gowdar

Bengaluru, India | [illegible] | [illegible] | LinkedIn | GitHub/Blog | Portfolio

TECHNICAL SUMMARY

Full Stack Developer with **3+ years of experience** building and scaling **e-commerce** and **SaaS platforms** using **MERN Stack**. Skilled in deploying secure, high-performance systems on **AWS, Redis, Docker, and CI/CD automation**. Passionate about building **data-driven, real-time apps** that enhance **user engagement** and **operational efficiency**.

CORE SKILLS

- **Frontend:** React, TypeScript, Redux Toolkit, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, TypeScript, REST APIs, GraphQL, Microservices Architecture
- **Database:** PostgreSQL, MongoDB, MySQL, Prisma ORM
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Docker, Redis, CI/CD (GitHub Actions), Nginx
- **Testing:** Jest, React Testing Library, Supertest, Mocha/Chai
- **Version Control & Tools:** Git, GitHub, Postman, Socket.io, Webpack
- **AI & RAG Ecosystem:** RAG pipelines, Jina Embeddings, Qdrant Vector DB, Google Gemini LLM, Semantic Search

PROFESSIONAL EXPERIENCE

Kushal's Retail Pvt Ltd | Bengaluru
Software Developer — Nov 2024 – Present

- **Architected a real-time inventory synchronization system** using Node.js, MongoDB, and AWS pipelines - ensuring accurate stock updates across 100+ stores and online platforms, cutting **fulfillment delays by 25%**.
- **Implemented OTP-based authentication** (Express.js + JWT), improving login success rates and **reducing cart abandonment by 12%**.
- **Developed personalized recommendation & gifting logic** using MongoDB aggregation + session filters, boosting **average order value (AOV) by 8%**.
- **Migrated backend infrastructure to AWS EC2/S3** with Redis caching, increasing scalability and reducing **hosting expenses by ~15%**.
- **Optimized Core Web Vitals** via lazy loading, image compression, and hydration tuning — **cutting page load time by 30%** and improving SEO performance.

Marmeto | Bengaluru
Software Development Engineer II — Jan 2023 – Nov 2024

- **Led backend development for Levi's India**, building a Node.js + MongoDB return/exchange flow that automated refunds and **reduced customer support tickets by 20%**.
- **Built dynamic coupon & discount engine** supporting multi-tier campaign rules, driving **a 10% lift in repeat purchases** across client brands.
- **Integrated third-party APIs** (Razorpay, Shiprocket, EasyPost) for unified payments and shipment tracking, improving **customer satisfaction by 15%**.
- **Directed Bewakoof's migration** from Salesforce to a **component-driven React architecture**, improving site speed and **reducing bounce rates by 18%**.
- Collaborated with cross-functional UI and DevOps teams to **enhance backend reliability and CI/CD deployments**, ensuring 99.9% uptime.

PROJECTS

ProcureFlow – Intelligent Procurement & GRN System (MERN Stack, Prisma, Redis, Microservices) | Link

- Designed a **procurement workflow engine** with vendor onboarding, PO lifecycle management, SKU validation rules, and auto-generated GRN records.
- Implemented microservices with **Redis caching, JWT auth, rate-limiting**, and Docker-based scalable deployments.
- Built a React + Redux dashboard with role-based access, approval flows, analytics, and real-time PO/GRN status updates.
- Optimized PostgreSQL queries & Prisma models achieving **sub-150ms response times** for high-volume operations.

NewsRAG – AI-Powered News Chatbot (Node.js, React, RAG, TypeScript, Qdrant, Redis) | Link

- Built a RAG chatbot using **Jina embeddings + Qdrant**, enabling semantic search across 100+ news sources (BBC, CNN, Reuters).
- Implemented multi-turn chat with Redis Upstash caching (sliding TTL).
- Developed Vite + React frontend with streaming UI responses; deployed globally on **Vercel + Render + Redis**.

EDUCATION

Sir M Visvesvaraya Institute of Technology
Bachelor of Engineering - 8.08 GPA — **2018 – 2022**
