Prasad
Analyst

[redacted]

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in identifying trends, developing dashboards, product analytics, and analyzing large datasets using SQL, Python and Power BI in a fast-paced environment. Delivered analytics-driven solutions, product insights, and automation using statistical analysis and machine learning that contributed to a 60% uplift across key business performance metrics. Skilled in solving complex business problems, stakeholder collaboration, and communicating data-driven insights with clarity and impact across technical and non-technical teams.

WORK EXPERIENCE

Data Analyst, *Delta India, Pune, India* — Jan 2024 – May 2025

- Used Python, SQL, and statistical analysis on 500K+ records to improve sales performance, driving a 60% quarterly uplift
- Integrated ERP, CRM, and finance data using SQL queries, improving data quality and reporting accuracy by 90%
- Built ML-based time-series models in Python to identify customer intent patterns, increasing conversions by 18%
- Delivered business insights via Power BI dashboards, reducing low-ROI investment by 25% and accelerating decisions
- Led end-to-end analytics initiatives, translating business questions into data-driven, statistically validated solutions.

Data Analyst, *Tibco Software, Pune, India* — March 2021 – Aug 2022

- Improved sales forecasting using SQL, Python, and statistical analysis on 5M+ records, increasing accuracy by 20%
- Built automated analytics pipelines and KPI dashboards, enabling real-time product insights across 12 business departments
- Applied predictive modeling and machine learning to inventory planning, reducing stockouts by 15% across business units.
- Performed A/B testing and statistical experimentation across 10+ segments to improve new-product forecasting by 20%.

AREAS OF EXPERTISE

- Python / R programming
- SQL / SQL server
- AWS / GCP
- Jira / Confluence
- Statistics / Artificial Intelligence
- Power BI / Tableau
- Microsoft Excel / PowerPoint
- LLM / RAG
- Agile / Scrum methodologies
- Communication skills
- Analytical skills
- Data Visualization
- KPI framework
- Machine learning
- Problem-solving skills

CERTIFICATIONS

PL-300: Microsoft Power BI Data Analyst | *Power BI, DAX query, Data cleaning*

- Microsoft PL-300 certified, demonstrating proficiency in data preparation, data modeling (OLAP), DAX automation, data analysis, report building, visualization best practices, performance optimization, and managing/deploying Power query.

DP-100: Microsoft Azure Data Scientist Associate | *Azure, LLM, NLP*

- Microsoft DP-100 certified, skilled in data prep, feature engineering, ML model development, Azure ML pipelines and deployment, plus experience with LLM applications and RAG systems.

PROJECTS

Amazon Sales Dashboard on Power BI | *Power BI, DAX query, CSV* — Github Link

- Built an interactive Power BI dashboard with robust data modelling, DAX measures, and visuals to analyse sales, profit, delivery performance, and key KPIs (e.g., YoY sales, profit trends) across regions, categories, and customer segments.

American Express Credit card fraud detection | *Pandas, Scikit-learn, TensorFlow, dbt* — Github Link

- Built a multi-model classification architecture to overcome severe data sparsity and class imbalance (0.172% fraud rate), implementing and tuning various boosting algorithms (XGBoost, CatBoost, LightGBM).

EDUCATION

Dublin City University, Master's Degree in Data Analytics — 2022 – 2023

Pune University, BE in Computer Science Engineering — 2015 – 2020
